CUBEMINE TARGETING SERVICE

Cubemine supports the Re-Target, User Target, Media Target and GEO Target to achieve the campaign goal. Depending on the KPI, CubeMine can choose or combine targeting methods.

Re-Targeting

Re-Target induces revisiting by exposing AD to User who experience to enter the advertiser site.
Re-Target is suitable for campaigns that require a high conversion by exposing AD to potential users.

User-Targeting

User Target finds users who are interested in the campaign and expose the AD.
Based on de-identification user data, Cubemine finds users who are similar to brand's customers and expose the AD.
User Target is suitable for marketer who want to attract new customers.

Media Targeting

Out of more than 1 million publishers, only media suitable for campaign user characteristics are grouped to expose AD.
The campaign can be transmitted by selecting not only the domestic & global premium publishers but also the publishers that marketers want.

GEO Targeting

Cubemine is able to expose the AD to global users. (KR, South East Asia, Japan, Australia, India)
